Coffee

WELCOME!

I'm Matteo, a full stack developer.

The main languages I knew and used are

- C# (.Net Core e Framework),
- Javascript, Typescript, React

On database side, SQL dbs (mostly SQL Server) and MongoDB as no-sql.

I use Git for source control. I know Docker & K8S basics.

If you want more info, check www.matteogregoricchio.com!

TECH STACK

C#

Typescript

MongoDB

Docker

Git

. Net (Core + Framework)

React

SQL Language

Azure Cloud

WORK EXPERIENCE

Deltatre

Full Stack Web Developer

(February 2020 - Present)

I work with:

- C#, .NET Framework, .NET Core
- Javascript, Typescript & React
- SQL Server, MongoDB, Docker

Deltatre

Web Support

(June 2018 - July 2020)

Monitoring of uefa.com and fifa.com sites during live events of those two associations. I^ level technical support (English lang) for operators/editors working during live events.

TechPump

Translator

(May 2015 - September 2018)

Translation projects eng-ita, online cultural contents.

PROJECTS

Shift Manager Tool

(March 2020 - Present)

A tool to create and manage shifts and the associated workforce.

Remember the basic: a shift exists because there is at least an event that requires coverage - not the opposite :) let the system get&check the events, make and show the shifts to you, forget the dull parts: nowadays you should fill in the staff names and leave everything else to the past!

EDUCATION

ITS ICT Foundation for Information and Communication Technologies

(October 2018 - July 2020)

Diploma of Higher Education (V EQF) Computer Science

97/100

<http://www.its-ictpiemonte.it/courses/backend-development/> .Net C# - Php - Javascript & JQuery - Relational Databases / SQL Language (on Microsoft SQL Server and MySQL) - Non-Relational Databases NO-SQL (MongoDB)

Università degli Studi di Torino
